SUMMARY

DevOps Engineer with 1.5 years of experience in enterprise release orchestration, infrastructure automation, and platform observability on Azure. Owns CI/CD delivery across 7 application portfolios and 4 environment tiers, with hands-on work in GitOps, DevSecOps gating, and Prometheus/Grafana monitoring. Azure and AWS certified.

EXPERIENCE

DevOps Engineer

Mar 2025 – Present

Cognizant

Chennai, India

- Managed release orchestration for 7 enterprise application portfolios via Azure DevOps pipelines, accelerating deployment cycles by 30% across 4 environment tiers (Dev, Test, Staging, Prod).
- Sustained 99.9% availability on supported applications, resolving 70+ weekly ServiceNow change/incident requests and SSMS SQL deployments.
- Administered 50+ SSL/TLS certificates (DigiCert, internal CA) across 250+ domains, eliminating expiry-driven outages.
- Built automation scripts for recurring operational workflows, cutting manual execution time per task by over 60% (5+ minutes to under 2) and removing a recurring source of human error.
- Authored SOPs and monthly BAU reports used by 10+ cross-functional stakeholders, standardizing 24/7 incident response.

Web Development & Research Intern

Dec 2024 – Mar 2025

Indian Institute of Science (IISc)

Bangalore, India

- Engineered a full-stack membership portal (Next.js, Supabase, Wix, Razorpay) for the ORSI Karnataka chapter, cutting manual administrative workload by 70% and improving sign-up throughput by 40%.
- Developed a Flask/Python app implementing the Best-Worst Method (BWM) as a multi-criteria decision tool, adopted by 50+ researchers.
- Modeled a simulated annealing scheduling algorithm projecting 67–74% cost reduction in simulation, and integrated a TSP routing model cutting modeled daily travel distance by 32.7%.

PROJECTS

- Secure CI/CD Pipeline for Spring Boot Microservices** | *Jenkins, Docker, Kubernetes, ArgoCD, SonarQube, Trivy* — GitOps pipeline for zero-downtime Kubernetes deployments with SonarQube and Trivy gates; 60% faster via Docker layer caching.
- AI Inference Gateway** | *AWS (ECS Fargate, ALB, VPC, IAM, SSM, ECR, CloudWatch), Terraform, FastAPI, Docker, Prometheus, Grafana* — Model-serving gateway provisioned as 21 Terraform-managed AWS resources, with per-request cost attribution in INR and a rolling-window spend circuit breaker that sheds load at HTTP 429 before the upstream call. Verified recovery by killing the running task and timing ECS reschedule through ALB re-registration.

SKILLS

DevOps & CI/CD:	Azure DevOps, Jenkins, GitHub Actions, ArgoCD, SonarQube, Git/GitHub
Containers & IaC:	Docker, Kubernetes, Terraform, Ansible
Cloud & Observability:	Microsoft Azure, AWS, Prometheus, Grafana, Azure Monitor
Platforms & ITSM:	ServiceNow, SQL Server Management Studio (SSMS), Linux, Shell Scripting, Bash, PowerShell
Security:	SSL/TLS, Certificate Lifecycle Management, DevSecOps Gating
Languages:	Python, Java, SQL
Certifications:	Azure Administrator Associate (AZ-104), Azure Fundamentals (AZ-900), Azure AI Fundamentals (AI-900), AWS Cloud Practitioner (CCP)

EDUCATION

B.E. Computer Science & Engineering — CGPA: 8.11 / 10.00

Nov 2021 – May 2025

Thiagarajar College of Engineering

Madurai, India

LEADERSHIP & PUBLICATIONS

- Community Operations Lead**, TechTribe — Led ops for an 1800+ member tech community; ran hackathons and workshops.
- Chair**, IEEE Student Branch | **CEO**, Entrepreneurship Cell — University Rank 1, IEEE Hackathon.
- Publication**: Blockchain-integrated IoV book chapter, *Research Advances in Network Technologies* (CRC Press, 2026).
