Professional Summary

Results-driven DevOps Engineer with hands-on experience in Azure CI/CD pipelines, production support, and cloud infrastructure. Seeking a Junior DevOps or SRE role to leverage automation and system observability to improve platform reliability.

Education

B.E. Computer Science & Engineering, Thiagarajar College of Engineering, Madurai
CGPA : 8.11/10

2021 – 2025

Skills

DevOps & CI/CD	Azure DevOps, Jenkins, GitHub Actions, ArgoCD, SonarQube, Trivy, Git
Containers & IaC	Docker, Kubernetes, Terraform, Ansible, Helm
Cloud	Microsoft Azure (AZ-900, AZ-104, AZ-204), AWS (CCP)
Observability	Prometheus, Grafana, ServiceNow, SSMS
Systems	Linux, Shell Scripting, PowerShell, Bash, SSL/TLS
Languages	Python, Java, SQL, Flask, Spring Boot

Experience

Junior DevOps Engineer

Jul 2025 – Present

Cognizant, Chennai

- Managed release orchestration for 7 enterprise application portfolios via Azure DevOps pipelines, promoting services across Dev, Test, Staging, and Production environments.
- Maintained **99.9% application availability** resolving 70+ weekly ServiceNow change/incident requests and executing SQL deployments via SSMS, and performing configuration XML file changes.
- Administered end-to-end lifecycle for **50+ SSL/TLS certificates** (DigiCert, Internal CA) across 250+ domains, ensuring continuous platform security.
- Executed automated validation scripts to ensure release integrity; authored monthly BAU reports and technical SOPs while maintaining 24/7 support coverage.

Web Dev & Research Intern

Dec 2024 – Mar 2025

Indian Institute of Science (IISc), Bangalore

- Engineered a full-stack membership portal (Next.js, Supabase, Wix, Razorpay) for the ORSI Karnataka chapter, **reducing manual workload by 70%** and increasing event sign-up efficiency by 40%.
- Built a Flask/Python web app implementing the Best-Worst Method (BWM) algorithm as a UI-driven MCDM tool, adopted by **50+ researchers**.
- Designed a Simulated Annealing-based algorithm that **reduced scheduling costs by 67–74%** and integrated a TSP routing model cutting daily travel distances by 32.7%.

Projects

- Secure CI/CD Pipeline for Spring Boot Microservices** | *Jenkins, Docker, Kubernetes, ArgoCD, SonarQube*
GitOps-based pipeline with ArgoCD for zero-downtime K8s deployments; SonarQube + Trivy gates for DevSecOps compliance. **Reduced pipeline execution time by 60%** via Docker layer caching.
- Containerized Monitoring Stack** | *Prometheus, Grafana, Docker*
Fully containerized observability platform monitoring CPU, memory, and microservice metrics in real time; configured Prometheus alerting rules simulating on-call incident detection.

Leadership

- Director of Operations, TechTribe** – Led operations for an 1800+ member tech community; spearheaded hackathons, speaker sessions, and hands-on tech events designed to make engineering accessible and engaging.
- Team Lead, E-Cell TCE** – Coordinated 5 operational verticals and 1000+ student volunteers across 5 large-scale events.
- Chair, IEEE Computer Society TCE** – Led 30-member team; secured **\$1000 IEEE High Impact Zonal Event grant** via competitive proposal.
- Published book chapter in *Research Advances in Network Technologies* (Taylor & Francis/CRC Press, 2026) on blockchain-integrated IoV systems.
