Professional Summary

Site Reliability / DevOps Engineer with 1.3 years of experience supporting cloud operations for enterprise application portfolios, driving incident management, deployment automation, and platform stability. Hands-on with AWS (VPC, EC2, ALB, Auto Scaling), Kubernetes, Docker, Terraform, and CI/CD pipelines (Azure DevOps, Jenkins, GitHub Actions), with monitoring and alerting via Prometheus and Grafana. Experienced in troubleshooting production incidents, managing releases across multi-tier environments, and improving operational efficiency at scale.

Education

B.E. Computer Science & Engineering, Thiagarajar College of Engineering, Madurai
CGPA : 8.11/10

2021 – 2025

Skills

Cloud & Networking	AWS (VPC, EC2, ALB, Auto Scaling, IAM), Azure (AZ-104 , AZ-900 , AI-900), DNS, Load Balancers,
Containers & IaC	Kubernetes, Docker, Terraform, Ansible
CI/CD & Release	Azure DevOps, Jenkins, GitHub Actions, ArgoCD, SonarQube, Git/GitHub
Monitoring & Ops	Prometheus, Grafana, ServiceNow (incident management)
Systems & Scripting	Linux (RHEL/Ubuntu, systemd, cron), Bash, Python, PowerShell
Databases	SQL (SSMS), Supabase/NoSQL

Experience

DevOps Engineer

Mar 2025 – Present

Cognizant, Chennai

- Managed deployments and release orchestration for **7** enterprise application portfolios across **4** multi-tier cloud environments (Dev, Test, Staging, Prod) via Azure DevOps pipelines, accelerating deployment cycles by **30%** and improving release efficiency.
- Drove incident management and troubleshooting to maintain **99.9% application availability**, resolving 70+ weekly production incidents via ServiceNow, executing SQL deployments, and applying configuration changes to protect platform stability.
- Administered end-to-end lifecycle for **50+ SSL/TLS certificates** (DigiCert, Internal CA) across **250+ domains** in a large-scale, customer-facing cloud environment, ensuring continuous platform security and reliability.
- Built custom Python/Shell automation scripts to reduce time-to-resolution for routine operational workflows, cutting manual execution time by over **60%** (from 5+ minutes to under 2 minutes per task) and reducing human error.
- Authored technical SOPs, incident reports, and monthly BAU reports used by **10+** cross-functional team members, streamlining incident response protocols and supporting continuous 24/7 operational maturity.

Web Dev & Research Intern

Dec 2024 – Mar 2025

Indian Institute of Science (IISc), Bangalore

- Engineered a full-stack membership portal (Next.js, Supabase, Wix, Razorpay) for the ORSI Karnataka chapter, **reducing manual workload by 70%** and increasing event sign-up efficiency by **40%**.
- Developed a Flask/Python web application implementing the Best-Worst Method (BWM) algorithm as a UI-driven MCDM tool, adopted by **50+ researchers**, and designed a Simulated Annealing-based scheduling algorithm reducing costs by **67–74%**.

Projects

- AWS Infrastructure Provisioning with Terraform** | *Terraform, AWS (VPC, EC2, ALB, Auto Scaling, IAM), S3*
Designed and provisioned a production-style AWS environment from scratch using Terraform — custom VPC with public/private subnets, EC2 instances behind an Application Load Balancer, Auto Scaling Group for horizontal scaling, and IAM least-privilege roles; managed remote state via S3. [Add 1–2 concrete outcomes: e.g. **provisioned N resources across N AZs, cut manual setup time from X to Y**, or **reduced monthly infra cost by X%** via right-sizing.] [github.com/\[your-repo-link\]](#)
- GitOps CI/CD Pipeline on Kubernetes** | *Jenkins, Docker, Kubernetes, ArgoCD, SonarQube*
Built and deployed a GitOps-based pipeline with ArgoCD for zero-downtime Kubernetes deployments; integrated SonarQube + Trivy gates for DevSecOps compliance. **Reduced pipeline execution time by 60%** via Docker layer caching.
- Containerized Observability Stack** | *Prometheus, Grafana, Docker*
Built a containerized monitoring and alerting platform tracking CPU, memory, and service-level metrics in real time; configured Prometheus alerting rules to simulate on-call incident detection and improve time-to-detect.

Roles & Achievements

- TechTribe Ops Lead** – 1800+ member community; **Taylor & Francis** book chapter, 2026.
